

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION II

DATE: 26 MAY 1987

SUBJECT: Emerson Street Landfill

FROM: Carole Petersen, Chief
Site Investigation Section

Carole Petersen

TO: File

On May 19, 1987, I spoke with Ray Lupe of NYSDEC regarding the Emerson Street Landfill Site located in Rochester, New York.

Mr. Lupe informed me that the State has tasked their consultants to write a work plan for a Phase II study at the site. The first part of this Phase II investigation will consist of a record search to try and determine what wastes were dumped into the landfill. Approximately 10-12 monitoring wells will then be installed, and various manhole and building sumps will be sampled. In addition, due to the possibility of low-level radiological wastes being dumped at the site, a radiological survey will be conducted.

John Swanson of NYSDEC Regional 8 office is the project engineer for the site. His number is 716-226-2466.
